## EXPERIENCE

### Lead UI Engineer, Unicommerce eSolutions Pvt. Ltd.

Jun 2018 - Jun 2023

- Developed & maintained features for web applications used by more than 20,000 e-commerce businesses to manage over 600 million transactions annually.
- Mentored and led a team of eight frontend developers in engineering the front-end for a SaaS product in the Order and Warehouse management domain, built with Angular and Ionic.
- Contributed to the design and implementation of a UX guideline and reusable UI component system based on Angular and Storybook.
- Led front-end development for new SaaS products in the e-commerce shipping and logistics sector, utilizing Next.js and React.
- Implemented, maintained and worked on the sunset process of an in-house Javascript framework built with vanilla JS and legacy libraries such as jQuery, Backbone and Underscore, among others.
- Involved in the hiring and onboarding process: screening and interviewing candidates, evaluating tech assignments, onboarding new team members.

### Frontend Engineer, iimjobs.com

Aug 2016 - May 2018

- Improved page load times by 50% by improving core web vitals thereby reducing user friction and increasing engagement.
- Collaborated with designers to develop a platform for recruiters to manage and search over 1 million resumes with a focus on innovative features and UX.
- Steered the engineering direction for a new PWA to be used as a jobseeker portal with a focus on accessibility and performance, built using React and NodeJS.

### UI/UX Developer, Mobikasa Inc.

Sep 2014 - Aug 2016

- Successfully built and delivered over 40 projects in the e-commerce domain, utilizing a wide range of tools including WordPress, Shopify, Magento, and WooCommerce with a focus on optimizing ease of use and performance.
  - Helped boost customer engagement up 20% by designing and implementing micro-sites and email templates for marketing campaigns driven by social media.
-
